## Minimum Clearances to Combustibles

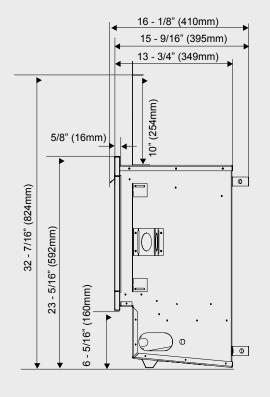

The \*clearances listed below are Minimum distances unless otherwise stated

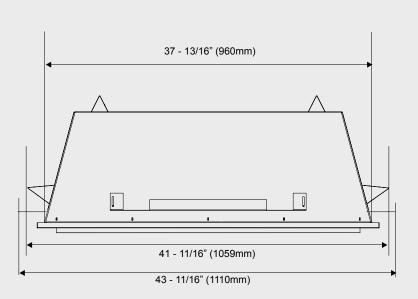

A major cause of fire is failure to maintain required clearances (air space) to combustable materials. It is of the greatest importance that the fireplace be installed only in accordance with these instructions

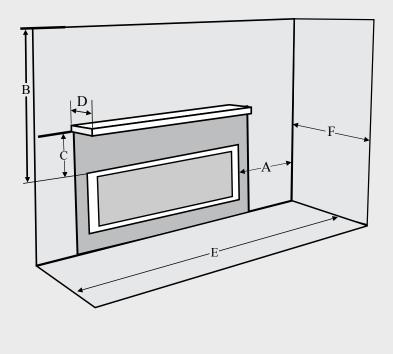

Clearance	Dimension	Measured From
A: Sidewall	11" (203mm)	Side of fireplace opening
B: Ceiling	36" (914mm)	Top of fireplace opening
C: Mantel Height (min.)	18" (457mm)	Top of fireplace opening
D: Mantel Depth (max.)	12" (304mm)	From wall
E: Alcove Width	57" (1148mm)	Wall to wall (minimum)
F: Alcove Height	36" (914mm)	Front to back wall (Maximum)
Notes:	0"	No hearth required *This table corresponds with the images on the right

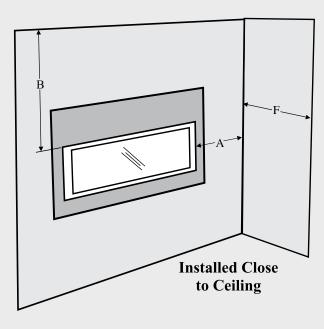

Cross ventilation is required. We strongly suggest when building your fire feature you plan for access to the gas connection and valve systems.

# **JGNITION SYSTEMS**

# Thermocouple Flame Sense BEST TFS

Thermocouple Flame Sense is an electronic valve ignition and flame monitoring system. Simply press the ON button on the hand held transmitter (provided) and the system will spark to light the flame. The Thermocouple Flame Sense features a safety shut OFF in case of loss of flame and a auto re-iight.

- If the main flame is not lit within 15 seconds, the gas will turn OFF, and an error code will sound.
- When the flame has been established, The Thermocouple remains hot enabling the fire pit to operate.
- If the flame were to be extinguished (by either high winds or heavy rain) the Thermocouple will cool down and turn the gas valve OFF. The TFS System will attempt to re-light for fifteen seconds. If the burner does not re-light within the fifteen seconds the burner will go into safety lockout. To unlock, simply press the OFF button on your Transmitter followed by your ON button.
- You can adjust the flame height with the HIGH / LOW buttons on the Transmitter. When turning ON your system for the first time, the default setting is HIGH. After that, the system will remember your last flame adjustment.

#### Features

- UL Listed ANSI Z21.97-2014/CSA 2.41-2014
- Thermocouple Flame Sense TFS technology with Reliable Direct Spark Ignition (Non Piloted, Non Filament Systems)
- Battery Operated Electronic Ignition with Safety Valve
- Pans Available in Round, Square and Flat Disc Configurations in a Variety of Sizes
- Ignition System features automatic re-light
- Robust Ignition System with full BTU output
- Includes On/Off/High/Low Remote Control (RCAF-3)
- 40% 50% Turn Down From High to Low (varies by model)
- Optional Remotes Include Wireless Timer, Wireless Wall On/Off Switch and Wireless Wall High/Low Wall Controls
- Consumer Warranty: 5 Year on Stainless Steel Components, 2 Year on Electronic Components, Gas Valve, Pilot and Igniter Assembly. Commercial Applications: 1 Year all parts.

GAS-FIRED

# Thermocouple Manual Safety

Thermocouple Manual Safety is a millivolt system that operates by rotating the valve control knob to the ON position and depressing inward, while simultaneously lighting the fire pit with a butane lighter. Keep the control knob depressed until the Thermocouple is hot and will maintain flame.

- To light, rotate the control knob counterclockwise to the ON position. Then press and hold the control knob inward and simultaneously light the edge of the burner with a butane lighter. To turn OFF, simply depress the control knob and turn clockwise to the OFF position.
- If the flame were to be extinguished (by either very high winds or heavy rain) the thermocouple will cool down, and the valve will turn the gas OFF.

#### **Features**

- UL Listed ANSI Z21.97-2014/CSA 2.41-2014
- Thermocouple Manual Safety TMS Technology (Non Piloted, Non Filament Systems)
- TMS System with Safety Valve, turns Gas Off When Flame Goes Out Match Throw Ignition
- Robust Ignition System With Full BTU Throughput
- Pans Available in Round, Square and Flat Disc Configurations in a Variety of Sizes
- Optional Manual Spark Igniter "MSI" Kit featuring Piezo Ignition (MSI-BSTMS)
- 5 Year on Stainless Steel Components, 2 Year on Gas Valve, Thermocouple and Igniter Assembly.
- Commercial Applications: 1 Year all parts.

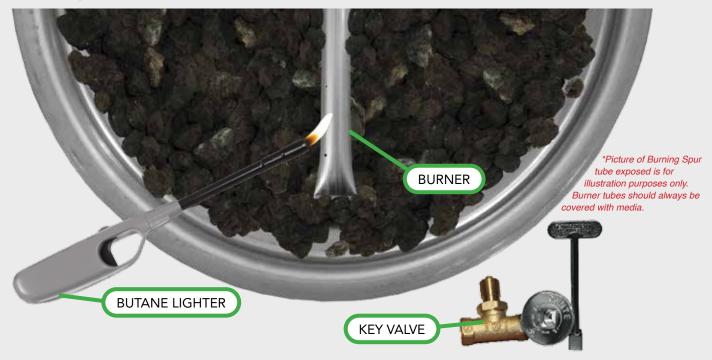

# Match Throw GOOD MT

The Match Throw system is by far the easiest system to maintain and understand. Just turn the key valve to on and light the main flame with a butane lighter.

- To light, turn ON your butane lighter and place over the outside edge of the burner. Then place the key into the recepticle on the key valve, and turn to the ON position; this will start the gas flow. This will ignite the main flame.
- CAUTION: In the event of the flame being extinguished, the gas will continue to flow.

#### Features

- UL Listed ANSI Z21.97-2014/CSA 2.41-2014
- Match Throw System
- Pans Available in Round, Square and Flat Disc Configurations in a Variety of Sizes
- Optional Manual Spark Igniter "MSI" Kit featuring Piezo Ignition (MSI-BSMTI)
- Consumer Warranty: 5 Year on Stainless Steel Components, 2 Year on Gas Valve.
- Commercial Applications: 1 Year all parts.

#### Minimum Clearances to Combustibles

The \*clearances listed below are Minimum distances unless otherwise stated

A major cause of fire is failure to maintain required clearances (air space) to combustable materials. It is of the greatest importance that the fireplace be installed only in accordance with these instructions

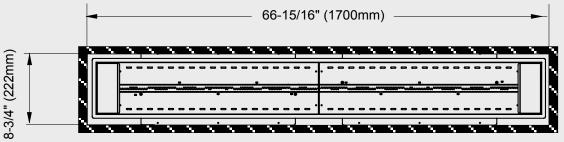

Clearance	Dimension	Measured From	
A: Back Wall	17" (432mm)	Burner to back wall	
B: Sidewall	17" (432mm)	Burner to side wall

## TOP MATERIAL CUT-OUT DIMENSION: 66 7/16" Long x 8 1/4" Wide

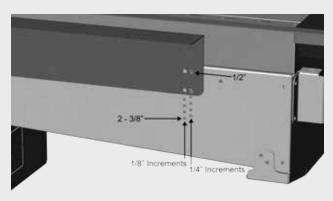

### Finishing

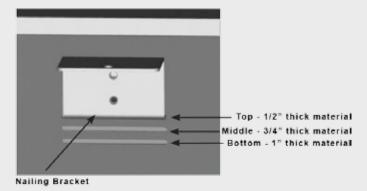

Side nailing brackets are adjustable for material from a minimum of 1/2" thick up to a maximum of 1" thick.

Side nailing brackets are adjustable in 1/4" or 1/2" increments. Each hole on the inside line is 1/8", each hole on the outside line is 1/4". Determine the thickness of the finishing material before adjusting the naling strips/

Determine total thickness of top facing and adjust nailing brackets. Top facing material is to be brought to unit edge for a finished look.

# Knock Down Ready to Finish Enclosures

## Knock Down (KD) Ready to Finish (RTF) Fire Pit Enclosures

RTF fire pits are fast, easy and efficient. The unique KD engineering of our Linear and Square fire pits, along with the temple of burner cutouts make your installation job easy from start to finish. (Burner not included)

#### Features

- Constructed with 1" x 1" 16 gauge Galvanized Structural Steel Tubing featuring a tensile strength up to 80,000 psi.
- Magnesium Oxide (MgO) board is pre-attached to the frame. MgO board features a superior fire protection, mold/mildew and water resistance when compared to cement based backer boards.
- Adjustable Burner Frame
- Top Panel with Burner Cutout Templates
- Transport to any backyard or roof deck.
- Magnesium Oxide (MgO) board is significantly lighter than cement backer boards making it easier to transport to any backyard or roof deck.
- Integrated Leveling Feet, allows up to 3 1/2" of adjustment
- Stainless Steel Air Vents (2 included)

Magnesium Oxide (MgO) board is virtually impervious to fire, water, insects; and does not feed mold or mildew; is not toxic, is non-flammable and non-combustible; is durable, maintains it's dimensional stability (even when wet) and has exceptional bonding characteristics.

Warning: When building a fire pit for use with LP Gas, understanding the properties of Liquid Propane is important. Propane is denser than air. Liquid Propane will have a tendancy to sink into any enclosed area and thus poses a risk of explosion and fire. Because of this risk we strongly recommend you build your fire pit incorperating the use of a pan or disc. Cross ventilation is required and acess to the gas connections and valve systems. Refer to pages 16 – 22 and 38.

FG-SB-F	Universal LP Conversion Kit for all size Fire Rings

BTU output is determined by the supply line size and the distance of the supply line run. Fire Rings can be used with Natural Gas and Liquid Propane. Liquid Propane use requires FG-SB-F LP Conversion Kit. Flame height is directly related to the BTU output of the unit. For maximum flame height, allow for 300,000 BTU for the 19" and 400,000 BTU for the 24, 30 and 36" Fire Rings. Fire Rings feature a 1 Year Limited Warranty.

Disclaimer: All products maximum BTU's are dependent upon proper gas pipe sizing. Gas flex connectors can also affect BTU's. As a result your maximum BTU's may vary. BTU listings are based on 7" W.C. for Natural Gas and 10" W.C. for Propane at the burner orifice.

> Cross ventilation is required. We strongly suggest when building your fire feature you plan for access to the gas connection and valve systems.

# Log Sets for Fire Pits

## Spit Fire Model#: L-SF

The Spit Fire is our most popular outdoor fire feature log set. The eighteen (18) piece refractory log set is a great alternative to enjoy your fire feature without the mess of real wood and ashes. Simply place the log set over your burner and enjoy.

- Compatible with fire pits larger than 19"
- Refractory Concrete Material
- 18 piece set
- Ships in 1 box, weights approximately 52 lb.
- 5 year limited warranty

## Sedona Model#: L-SEDONA

The Sedona is the Grand Daddy of all the Firegear Outdoors log sets. Massive is an understatement. This nineteen (19) piece majestic fire pit log set can stack as high as 32" tall. Word for the wise, you need a big fire pit to hold this beauty. We suggest a minimum of 25" diameter/pan.

- Compatible with fire pits larger than 25"
- Refractory Concrete Material
- 19 piece set
- Ships in 3 boxes, weights approximately 200 lb. and must be shipped LTL
- 5 year limited warranty

### Beach Fire Model#: L-BF

The Beach Fire is the baby sister of the Spit Fire, designed for smaller fire pit burners or used as an accent piece on larger burners. This eight (8) piece refractory log set is a great alternative to enjoy your fire feature without the mess of real wood and ashes. Simply place the log set over your burner and enjoy.

- Compatible with fire pits smaller than 20"
- Refractory Concrete Material
- 8 piece set
- Ships in 1 box, weights approximately 20 lb.
- 5 year limited warranty

## Driftwood Twig Set Model#: 326-930

The beauty of beach washed and twisted Driftwood twigs inspired this design, which looks amazing with any fire. The coloration is truly a work of art.

- Compatible with any size fire as an accent peice
- Ceramic fiber composition with special bonding agents helps protect it from the elements (suggest covering when not in use)
- 6 piece set
- Ships 1 box, weighs approximately 22 lb.
- 1 year limited warranty

Natural Gas (NG) flow is given in thousands of BTU/hr. - One cubic foot of LP gas - 1000 BTU

Nominal pressure at the burner for Natural Gas is 3.5" of water column. (Typical machine supply 5"-7")

Pipe length must include additional length for all fittings. Add approximately 5 feet of pipe per fitting.

Natural Gas Example: A machine with a burner that requires 440,000 BTU would need a 1 -1/4" pipe for a 20" long run.

Liquid Propane (LP) Gas flow is given in thousands of BTU/hr. - One cubic foot of LP gas - 2516 BTU

This chart refers to low pressure LP, after regulation, Standard nominal pressure at the burner for Liquid Propane Gas is 11" of water column. Pipe length must include additional length for all fittings. Add approximately 5 feet of pipe per fitting.

LP Example: A machine with a burner that requires 440,000 BTU would need a 1" pipe for a 20' long run.

NOTE: The sizing charts above list the specific pipe sizes required for the amount of BTU's for a new gas line installations. If you are using an existing gas line you must take into consideration the existing gas line capacities to ensure you will have proper pressure. This chart is for reference only, we recommend you consult with a Licensed Plumber/Gas Fitter or NFPA54 (National Fuel Gas Code - current edition) for more details.

## MAP Policy

Firegear Outdoors a Division of Skytech Products Group has carefully established its Minimum Advertised Pricing (MAP) program for products sold whether through traditional or Internet retailers effective January 1, 2014. All retailers have the legal right to set their own retail prices. However, Firegear Outdoors has unilaterally determined that excessive discounting and price promotions of our products detract from their value and image. Therefore, Firegear Outdoors will not continue to sell their products to retailers, whether traditional or internet, whose conduct adversely affects the image and value that Firegear Outdoors seeks to maintain.

The MAP Policy applies to all advertisements of Firegear Outdoors products in any and all media, including, without limitation, flyers, posters, coupons, mailers, inserts, newspapers, magazines, catalogs, mail order catalogs, Internet or similar electronic media including websites, email newsletters, email solicitations, television, radio and public signs. The MAP policy is not applicable to any in-store advertising that is displayed only in the store and not distributed to any customer. In store displays, point-of-sale signs, hang tags or bar codes or similar marks on products or product packaging which merely state the price are not considered "advertising" for purposes of this MAP policy.

The current listing of products and applicable MAP prices can be obtained by contacting Firegear Outdoors office (888) 672-8929 or request via email info@firegearoutdoors.com. The products and MAP may be changed from time to time at Firegear Outdoors sole discretion. Firegear Outdoors resellers are responsible for remaining current with MAP policy, products and pricing.

This policy applies only to advertised prices and does not apply to the price at which Firegear Outdoors products are actually sold or offered for sale to an individual consumer within resellers' retail location or over the telephone.

Price promotion of a discontinued product as long as it is clearly marked as discontinued is not a violation of this policy. All retailers may offer Firegear Outdoors products at any price in excess of the Retail/MAP. MAP for all advertising, promotion or sales shall not be less than Retail/Map in effect at the time of the sale.

Firegear Outdoors Distributors will cooperate in following MAP policy and in making sure that these polices are adhered to by their dealers. Distributors may sell to Internet dealers, provided that the Internet dealer abides by the Firegear Outdoors MAP policy.

If Firegear Outdoors determines that any product is being advertised by any retailer below the MAP, the retailer will be notified by Firegear Outdoors. If the situation is not remedied in a reasonable time, Firegear Outdoors will cease product shipment to the retailer and could include termination of future sales of Firegear Outdoor products to the dealer. After such termination any financial and confidentiality obligations under such contract shall survive. For legal reasons, Firegear Outdoors employees and sales representatives may not discuss this policy or any violations with any retailer or their employees. We request that you not attempt to discuss such matter with them. Due to the constraints of federal and state antitrust laws, we are unable to discuss the policy or it's applications with any retailer or their employees.
